

**NRL Directed Energy Visiting Scholars Program:** We are currently accepting applicants for the 2022 Directed Energy Visiting Scholars summer program at the U.S. Naval Research Laboratory in Washington, D.C. This paid summer internship program offers students the opportunity to participate in theoretical or experimental projects within the field of directed energy. Directed energy research areas at NRL include high power laser physics, laser propagation in the atmosphere, laser-matter interactions, microwave physics, underwater laser applications, and nonlinear optics. Candidates must be a currently enrolled undergraduate or graduate student at a U.S. college or university pursuing a major in an appropriate STEM related field. Positions are open to U.S. citizens only.

To apply please include a current resume and indicate your citizenship or residency status. The application deadline is February 28th, 2022.
